The picoUPS-120-ATV is a small yet powerful UPS (uninterruptible power supply) solution. The picoUPS-120-ATV was conveniently design to be compatible with quarter brick PSU standard (58 x 36mm).

The picoPSU-120-ATV ensures uninterrupted power for your electronics by automatically switching in between a DC input source (13-18V) and a Lead Acid (SLA battery). The switching in between the power sources is instantaneous, thus allowing smooth, uninterrupted device operation. The picoUPS-120-ATV also has a built-in, 1.2A fast battery charger unit.

The PICOUPS-120-ATV has been specifically designed for uninterruptible small/medium power PC operation, where "always on" operating is required. Applications for the picoUPS include a wide range of systems including servers and telecom and high availability systems. These applications often have either N+1 redundant power supplies, redundant power buses, or both.

Technical specifications

- Input : 6-18VDC
- Max. Load : 6A fanless / 10A fan
- Peak Load : 12A
- Dimensions : 58 x 36 x 20 mm (1U kompatibel)
- Weight : 30g
- Efficiency : 95%
